

The Streifeneder silicone liners offer solutions to meet a wide range of user requirements. Each liner uses robust, first-class materials, alongside Streifeneder's new knit technology, to provide a great balance of comfort and function.

The AKControl.Sil is an above-knee 2mm silicone liner made with moderately firm silicone.

Features and Benefits

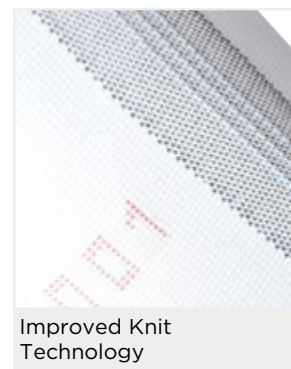

- Ideal silicone liner for distal suspension on residual limbs with reasonable soft tissue coverage
- Suitable for low, moderate and high activity levels
- Lined with antiseptic additives called 'SteriOne', to help keep liners free of bacteria and micro-organisms
- Vertical panels resist elongation
- For above knee patients, alternatively may be useful for a larger transtibial residual limb
- Easy to don and doff due resilient polyamide/elastane cover
- Optional anti-rotation silicone strips prevent twisting between liner and socket (NMA60L10 only)
- Integrated coloured vertical stripe for easier donning orientation
- Distal silicone-rotation control
- Available with distal connection
